SWAROOP VILAYANUR SIVARAM Email: swaroop.v.s@cognizant.com
Mobile: 657-400-6409

Career Overview

- 12+ years of experience in IT industry **Manufacturing & Logistics**, **Retail and Insurace** domain.
- Strong knowledge of UiPath. Certified Advanced Developer.
- Strong knowledge of Automation Anywhere. Automation Anywhere Certified Advanced RPA Professional.
- Strong knowledge of **EDI** transactions like **850, 810, 856/857, 855, 997**
- Expertise in systems like **Sterling Integrator, AS400,** OS/390, MS-DOS, Window sNT, Linux & Unix
- In-depth knowledge of **Scrum** framework and **Agile** principles
- Thorough understanding of Software Development Life Cycle (**SDLC**) and Software Testing Life Cycle (**STLC**)
- Highly skilled in transforming the requirements of business users and stakeholders to Functional requirements' document (**FRD**) and to Mapping requirements specifications document (**MRS**).
- Efficient at prioritizing tasks for complex projects across globally distributed teams
- Experience using testing and defect logging tools like **JIRA**
- Executed projects with stringent timelines very effectively
- Flexible and versatile to adapt to any new environment and share new concepts with team members
- Strong Analytical Skills, innovative, self-motivated team player with excellent communication skills
- Handled trainings on EDI for resources
- Created many tools for various projects

Skills

Technology/Frameworks:	**UiPath, ReFramework, Automation Anywhere, EDI (X12, EDIFACT)**, **Scrum,** Integration technologies, **SAPIDoc**, Flat files, Mainframes, C, C++, Core Java, VB Scripting, Selenium framework, DB2 and IMS, Python.
Tools /IDE:	JIRA, Gentran 6.2, File – Aid, Inter-Test, Platinum, Screen Development Facility (SDF), Connect Enterprise, Control-M, Control-D, BMC Remedy. ITSM, Sterling Integrator, REXX, Simon, SharePoint, MS Office suite, MS Access, Eclipse, Netbeans.

Certifications

Automation Anywhere Certified Advance RPA Professional
RPA Advance Developer Certificate (Code: 123386676437323777)
CTKEG173_Intelligent Process Automation 101 Certificate
UI Path Level 1 - Foundation 2018.3(CTKEG173_Intelligent Process Automation 101 Certificate)
UI Path Level 2 - Orchestrator 2018.3(CTKEG253_UiPath 202 - UiPath Orchestrator)
UI Path Level 3 - RPA Developer Advanced Diploma(CTKEG254_UiPath 203 - Ui Path SAP Automation)
Infosys and Cognizant internal technical and domain certifications.

Awards

U-Matter Awards   -   Imaginative innovator – Winner
Hackathon   -   Runner up
Delivery Excellence Award
Received "Certificate of Participation" for Hackathon

Automations and Tools

Dollar Savings for tools created in all projects : $1,751,786

Educational Qualification

Master Computer Science from BITS PILANI
Bachelor of Engineering, Computer Science from Visvesvaraya Technological University (VTU) - Bangalore, India.

Professional Profile

Cushman & Wakefield – USA   **Aug 2019 – Present**
Role: RPA Business analyst
Skills applied: RPA UiPath.

- Conduct daily stand-ups with the team, **Design test plans for Robotic Process Automations**, Lead **Test** cycles with internal teams and Client.
- **Communicated with department leads** on a regular basis with status reports
- Engaged in all SDLC phases such as Analysis, Design, Development, Integration, Testing, Maintenance and Production Support
- Hands on Experience in creating PDD (Process Definition Document), developing respective SDD (Solution Design Documents) and Creating Runbook (Operational Process Handbook)
- Very skilled and diligent at performing GAP analysis and ensuring the business requirements are captured, documented, maintained and met throughout the lifecycle of the program.
- Developed Automated Projects using RE Framework.
- Setting up User machines with UiPath.
- Post production support.

MRI Bank Reconciliation RPA using UiPath
RPA is part of the larger MRI month end processes conducted within the MRI software and supported by the Client Accounting team. Bank Account numbers need to be extracted from pdf bank statements and reconciled on the MRI software for available bank IDs based of chosen criteria. The Bot downloads the Bank IDs from MRI application and downloads the pdf bank statements from the SharePoint folder. The Bank ID and the Bank statements form the input for the Bot. The bot extracts all the required information from the bank statements and using the downloaded bank IDs completes the reconciliation process for all the bank accounts in the pdf bank statements. The combined report for each account is generated and then merged to a single pdf report and sent to the accounting team. The log files are created for each transaction and placed in the SharePoint folder. Appropriate emails are generated if any errors. The errors are captured in the summary status report spreadsheet.
Environment: MRI software, UiPath Studio, SharePoint, Outlook, Excel.

Asset Services Vendor Setup RPA using UiPath
RPA is part of Onboarding Vendor Setup supported by the CTO/COO Business unit team. The Bot extracts all the Vendors that need to be setup from Vendor Management System. The bot checks for compliance for each Vendor in the TinCheck Application. The bot completes the setup of the vendors in the YARDI system using certain criteria. The summary status report is generated and placed in the SharePoint folder. Appropriate emails are generated if any errors. The errors are captured in the summary status report spreadsheet.
Environment: Vendor Management System, YARDI, TinCheck, UiPath Studio, SharePoint, Outlook, Excel.

Batch Reporting RPA using UiPath
RPA is part of Batch Reports supported by the CTO/COO Business unit team. The Bot extracts the input file from the MRI software. The bot generates the Batch reports for the report IDs mentioned in the input file. Once the reports are generated, the bot combines the reports in the order mentioned in the input file and sends the combined report to the email ID mentioned in the input file. The summary status report is generated and placed in the SharePoint folder. Appropriate emails are generated if any errors. The errors are captured in the summary status report spreadsheet.
Environment: MRI Software, UiPath Studio, SharePoint, Outlook, Excel.

3M Company – USA   **Nov 2012 – May 2019**

Role: EDI Onsite Lead

Skills applied: Gentran 6.2, File – Aid, ITSM, REXX, Simon, Sterling Integrator, Agile, HP ITSM, JIRA, MS Office Suite, Selenium, VB Script, JavaScript, Java, EDI X12 and EDIFACT

- Conduct daily stand-ups with the team, **Design test plans for upgrade/migration** activities, Lead **Test** cycles with internal teams and trading partners.
- **Managed project and Communicated with department leads** on a regular basis with status reports
- Very skilled and diligent at performing GAP analysis and ensuring the business requirements are captured, documented, maintained and met throughout the lifecycle of the program.
- Create test plans, test cases, test data and ensured that all the defects are captured and updated in JIRA
- **Interfaced with top management** to ensure that IT initiatives and involvement are clearly communicated and understood.
- **Created project plans** to manage the overall delivery of the project and maintain the resource to task allocation. Prepared a **roadmap** to ensure the delivery of the project in line with the industry standards
- Created tools to extract the data required for testing and to validate the test results
- Created guides and presentations of the newly migrated system, logged the defects with proper attributes like priority, severity and shared the reports with the management on a regular basis
- Requirements elicitation, analysis and creation of FRD for any new transaction
- Creating Mapping requirements specifications document. Preparing the design documents and test plans for the map. Coding EDI maps for trading partners. Unit testing of the map. End to end testing with the trading partners. Deployment in production environment. Post production support.
- Tracking schedule for the requests providing status report to the client

Client: 3M Company - Cognizant (India)   **Apr 2011 – Nov 2012**

Role: Senior Analyst

Skills applied: MS Excel, MS Visual Studio, Gentran 6.2, File – Aid, Inter-Test, Platinum, Screen Development Facility (SDF), Connect Enterprise, Control-M, Control-D, BMC Remedy, ITSM, REXX, EDI X12 and EDIFACT

- Understanding the business and trading partner's requirements. Creating Mapping requirements specifications document. Design and setting up of maps in the test environment.
- Preparing the design documents and test plans for the map.
- Coding EDI maps for trading partners. Unit testing of the map. End to end testing with the trading partners. Deployment in production environment. Post production support.
- Tracking schedule for the requests providing status report to the client
- Create test data for performance and regression testing.
- Assisted the project manager throughout the different phases of the project.
- Document procedures, use cases, business processes and user guides.
- Created multiple tools to automate and reduce manual effort.

Client: Ingram Micro – Infosys (India)   **Jul 2007 – Apr 2011**

Role: Senior Analyst

Skills applied: MS Excel, MS Visual Studio, Gentran 6.2, File – Aid, Inter-Test, Platinum, Screen Development Facility (SDF), Connect Enterprise, Selenium framework for testing, VB Script, JavaScript, Java, C, C++, Control-M, Control-D, BMC Remedy, ITSM, REXX, EDI X12 and EDIFACT

- Understanding the business and trading partner's requirements.
- Design and setting up of maps in the test environment. Preparing the design documents and test plans for the map .Coding EDI maps for trading partners. Unit testing of the map by running the required JCLs.
- End to end testing with the trading partners. Deployment in production environment.
- Post production support. Tracking schedule for the requests providing status report to the client
